ANGRY WOLVES V2

Mission Polish Report

This PDF packages the last Codex response for the V2 mission-polish pass, plus the screen captures generated for review.

Branch: `tune/v2-mission-polish`
Version shown in game: `v0.38-v2-mission-polish`
Artifact folder: `refresh-assets/mission-polish-v2`

Last Response

```
Worked on existing branch `tune/v2-mission-polish`, which is already based on current `origin/main`
at `c2caf06`.

No commit, merge, deploy, or push was made in this pass.

**Changed**
- [game.js](/Users/kevinhegg/Documents/angry-wolves-tune-v2-mission-polish/game.js)
- [MISSION_LADDER_V2.md](/Users/kevinhegg/Documents/angry-wolves-tune-v2-mission-
polish/MISSION_LADDER_V2.md)
- [ROLLBACK_PLAN.md](/Users/kevinhegg/Documents/angry-wolves-tune-v2-mission-
polish/ROLLBACK_PLAN.md)
- Screenshots: [refresh-assets/mission-polish-v2](/Users/kevinhegg/Documents/angry-wolves-tune-v2-
mission-polish/refresh-assets/mission-polish-v2)
- Full diff: [full-diff.patch](/Users/kevinhegg/Documents/angry-wolves-tune-v2-mission-
polish/refresh-assets/mission-polish-v2/full-diff.patch)

**What Changed**
- Code and `MISSION_LADDER_V2.md` now agree on the polish spec.
- Early animal missions still scale to `1 herd` for first sessions, then return to `2 herds`.
- Added fuller `?debugMissionFlow=1` logs: raw/scaled targets, previous mission/family, weights,
repeats, streak, rewards.
- Added lightweight family-repeat down-weighting so mission flow varies a bit more.
- Angry Wolves now shows/plays the warning cue: `Angry Wolves: big howl, big trouble.`
- Added screenshot-only debug states for Rain Barrel, Pack Howl, mud-eat, and Angry Wolf effect
captures.
- Reward/streak rules unchanged: flat mission rewards, capped streak bonus, no restored
multipliers.
- Version remains `v0.38-v2-mission-polish`; leaderboard metadata remains V2-separated with
cols/rows/job fields.

**Validation**
- `node --check game.js` passed.
- `git diff --check` passed.
- No `package.json` exists, so there is no npm build/test command to run.
- Safety patch created: [PRE_MISSION_POLISH_SAFETY.patch](/Users/kevinhegg/Documents/angry-wolves-
tune-v2-mission-polish/PRE_MISSION_POLISH_SAFETY.patch). It is empty because there were no tracked
uncommitted changes before this pass.

**Test URL**
Server is still on port `4175`:

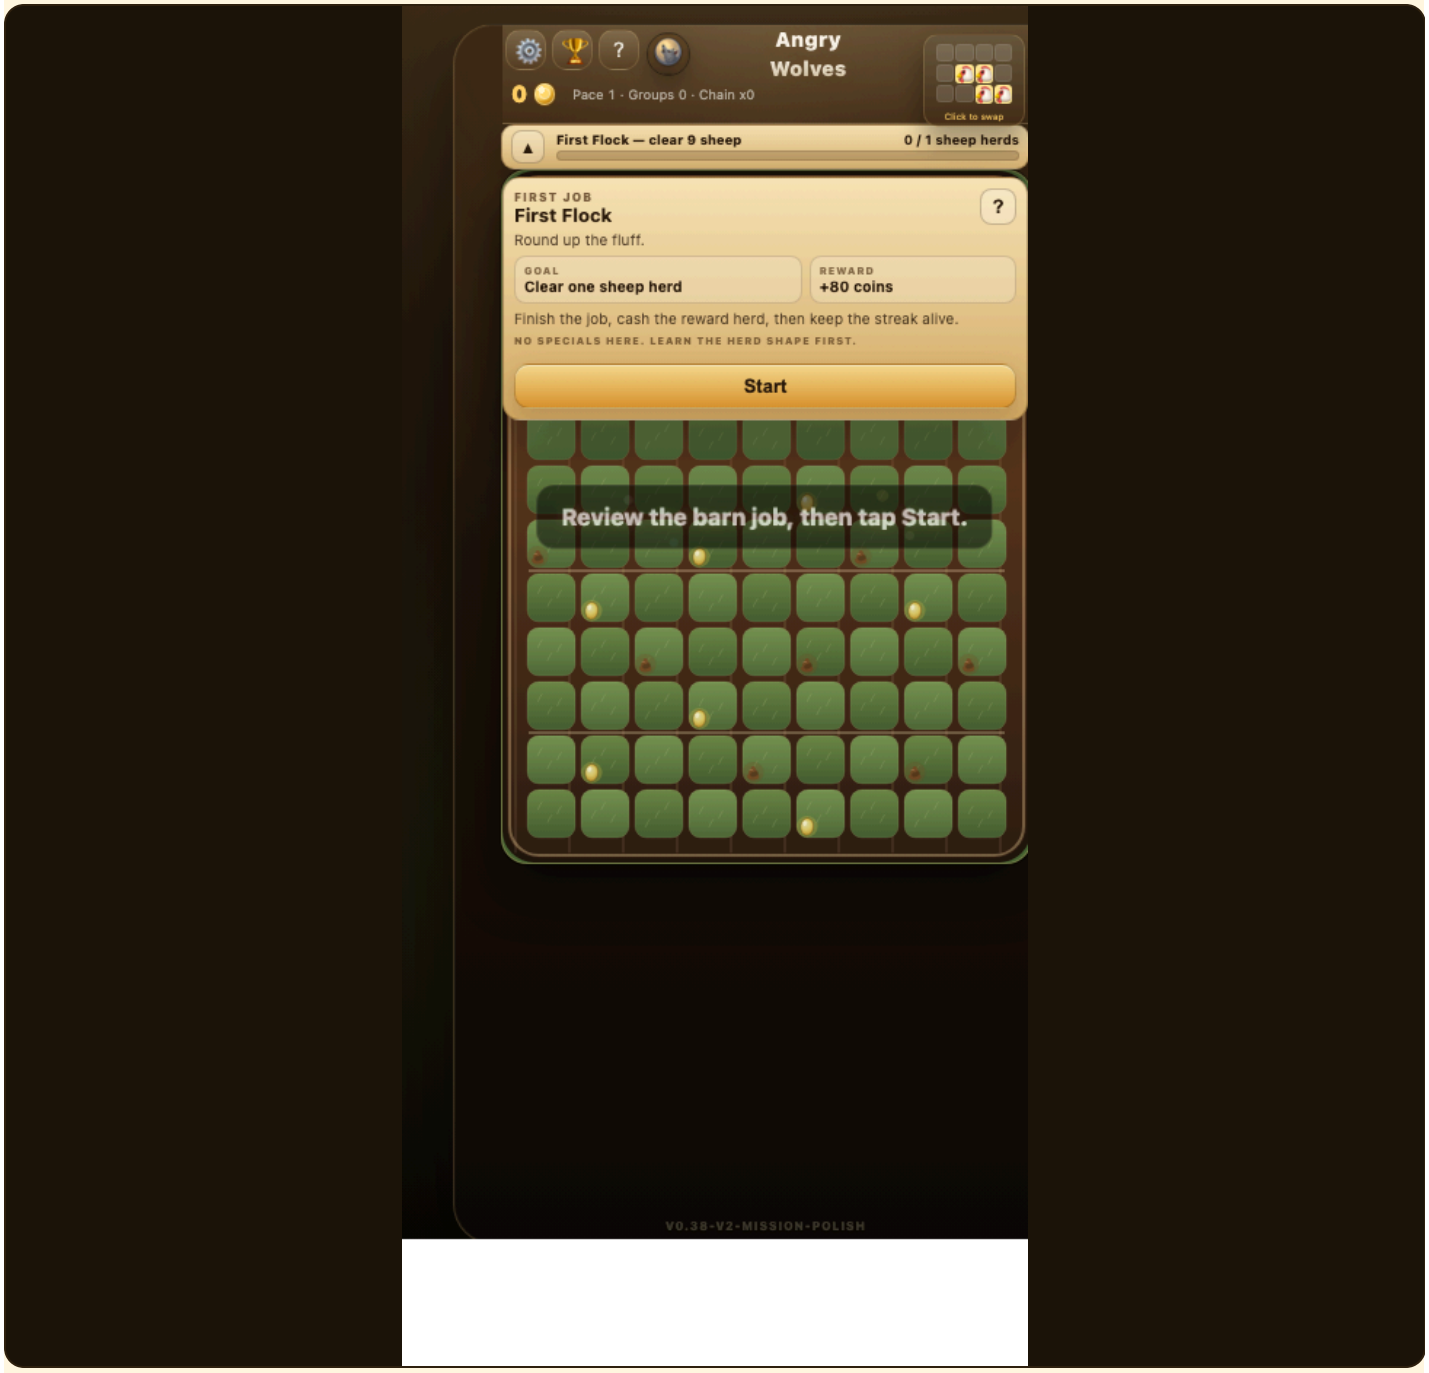
[http://192.168.0.30:4175/index.html?debugMissionFlow=1&_bust=v038polish2]
(http://192.168.0.30:4175/index.html?debugMissionFlow=1&_bust=v038polish2)

Status: waiting for approval before committing.
```

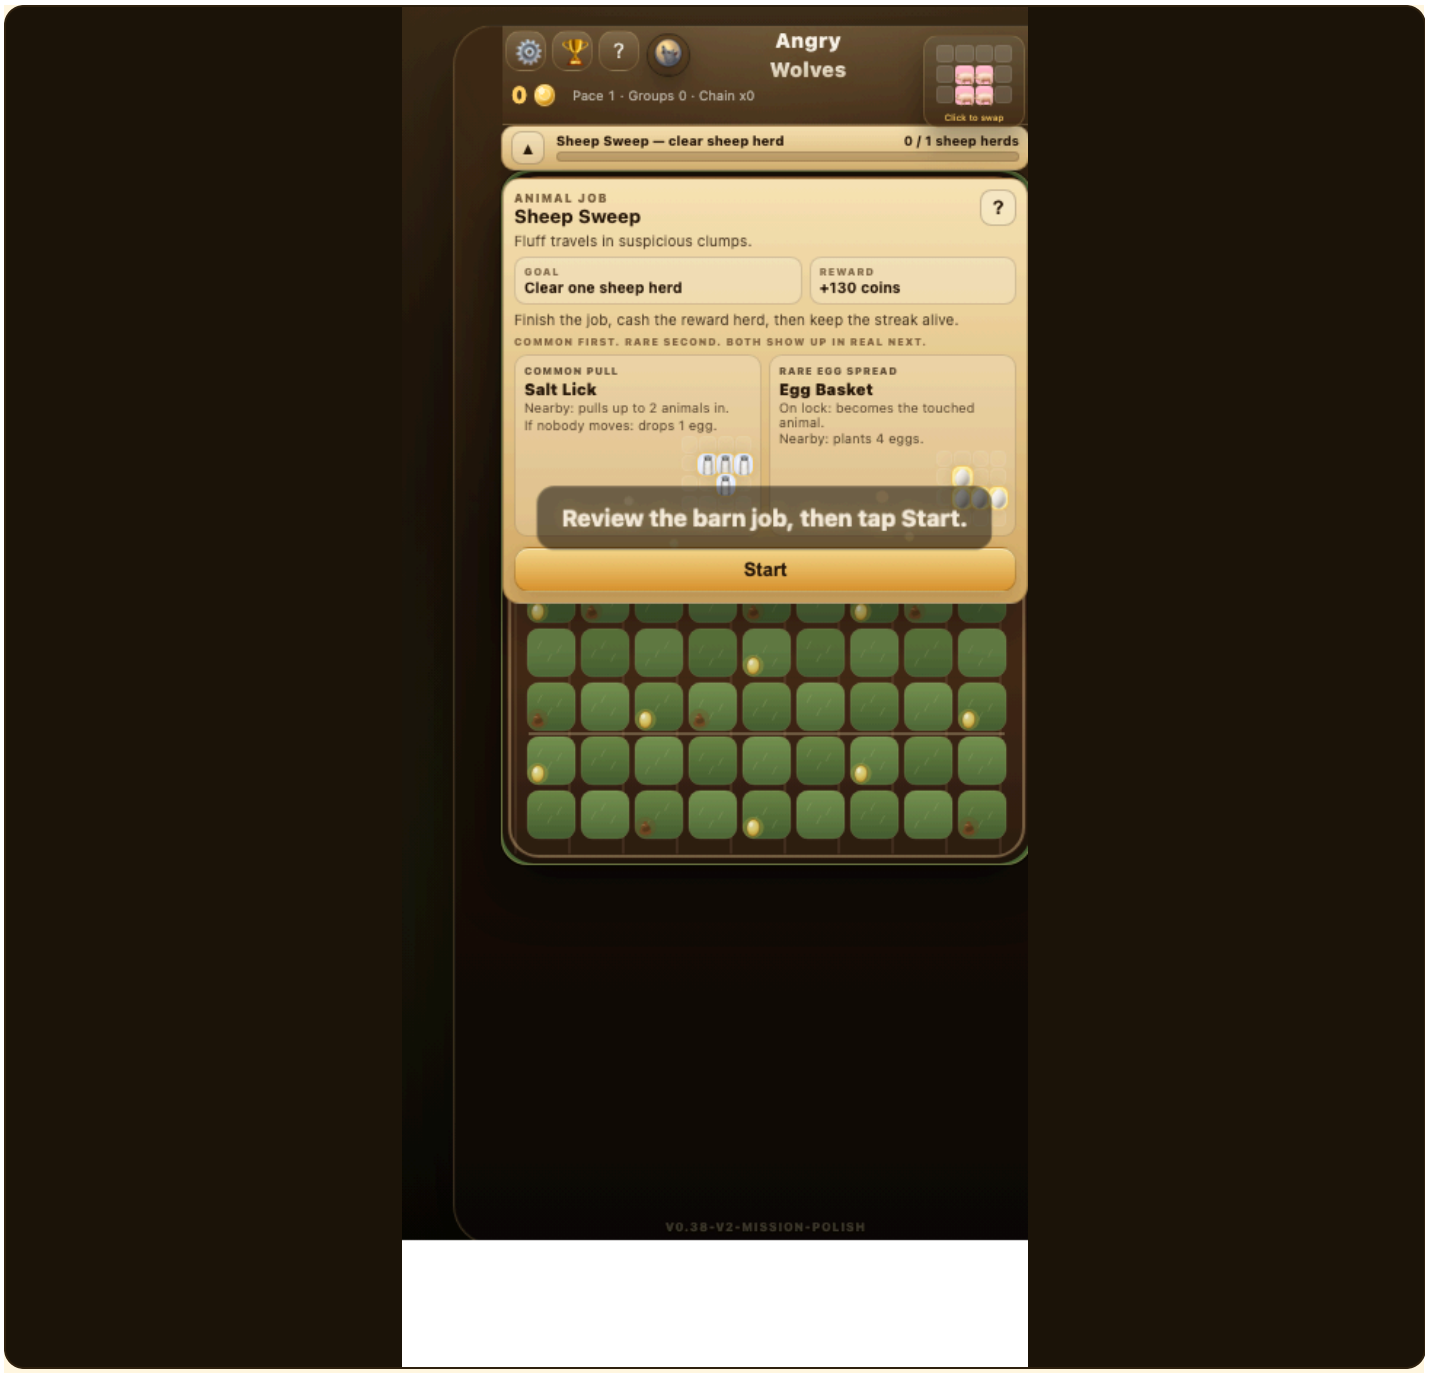
Committed Scope

The commit includes the V2 mission polish code/docs changes, the mission-polish screenshot package, this PDF report, and a small static asset query bump in `index.html` to reduce iPhone Safari cache confusion. It does not include older unrelated artifact folders.

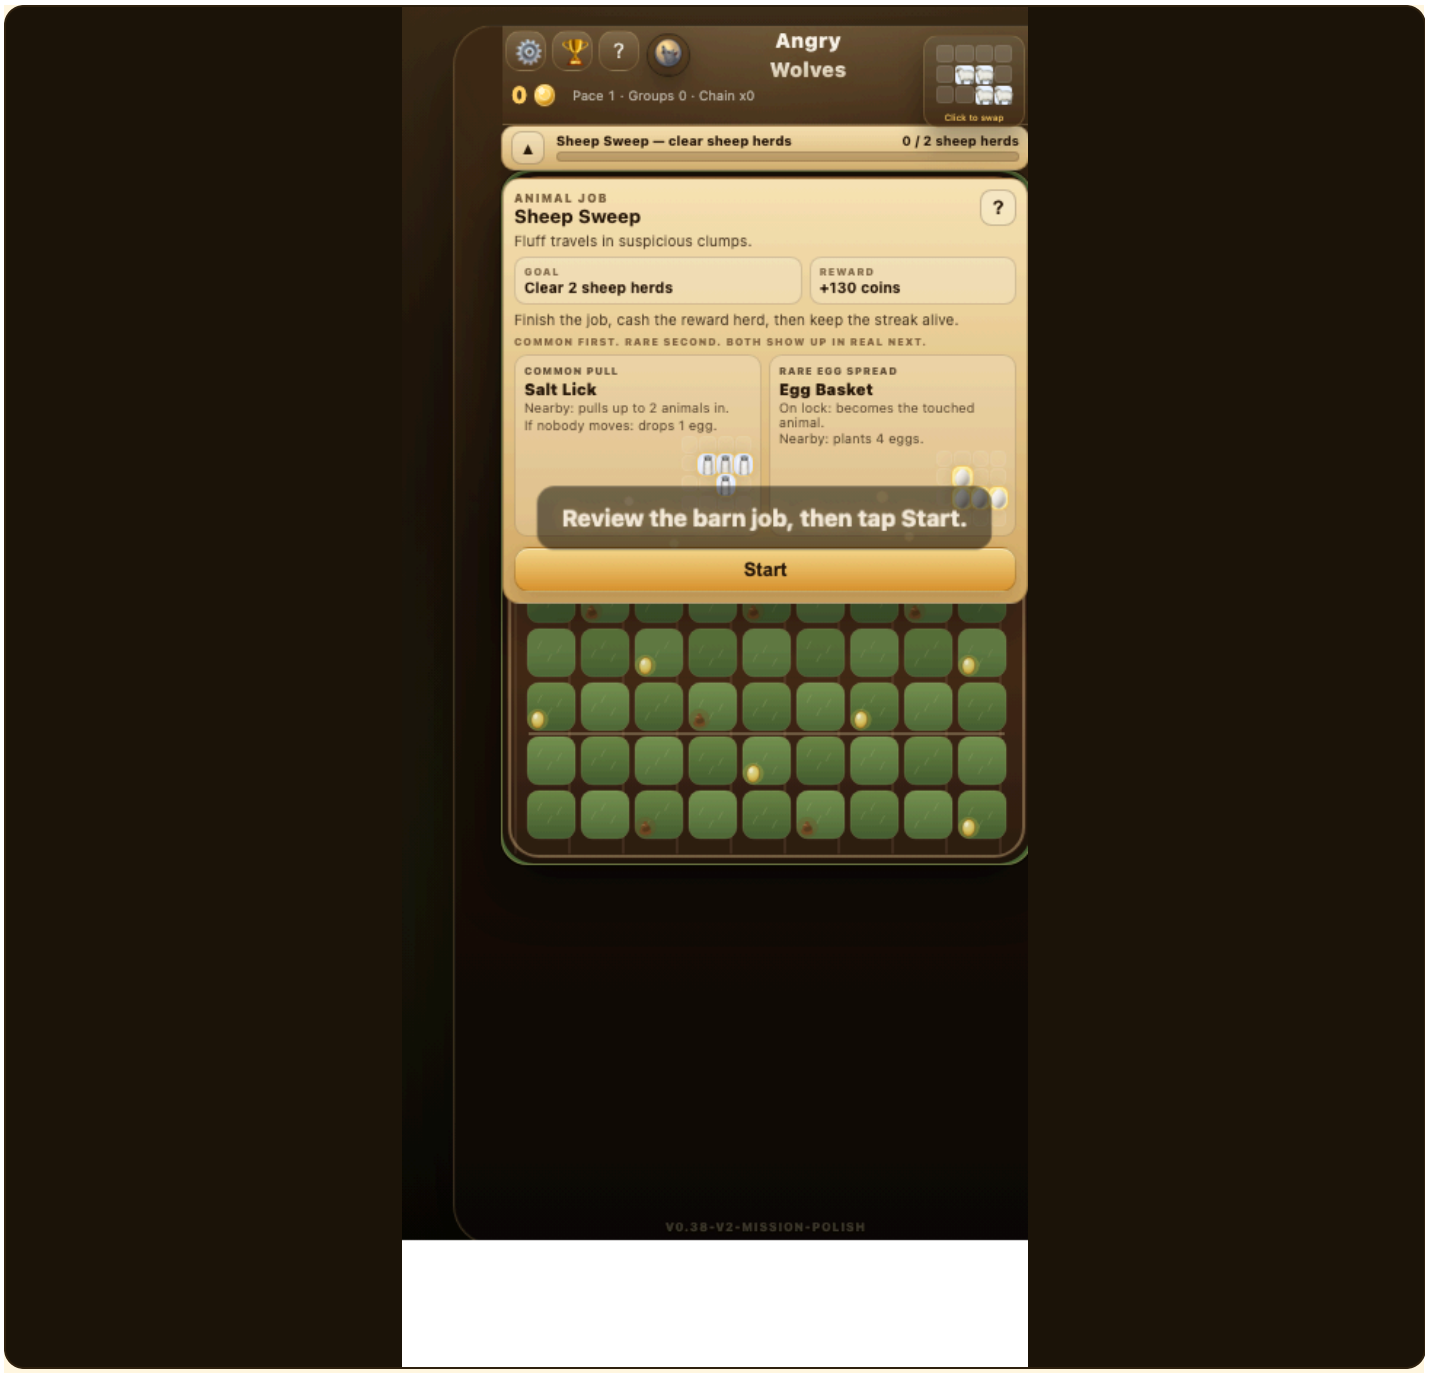
Screenshots



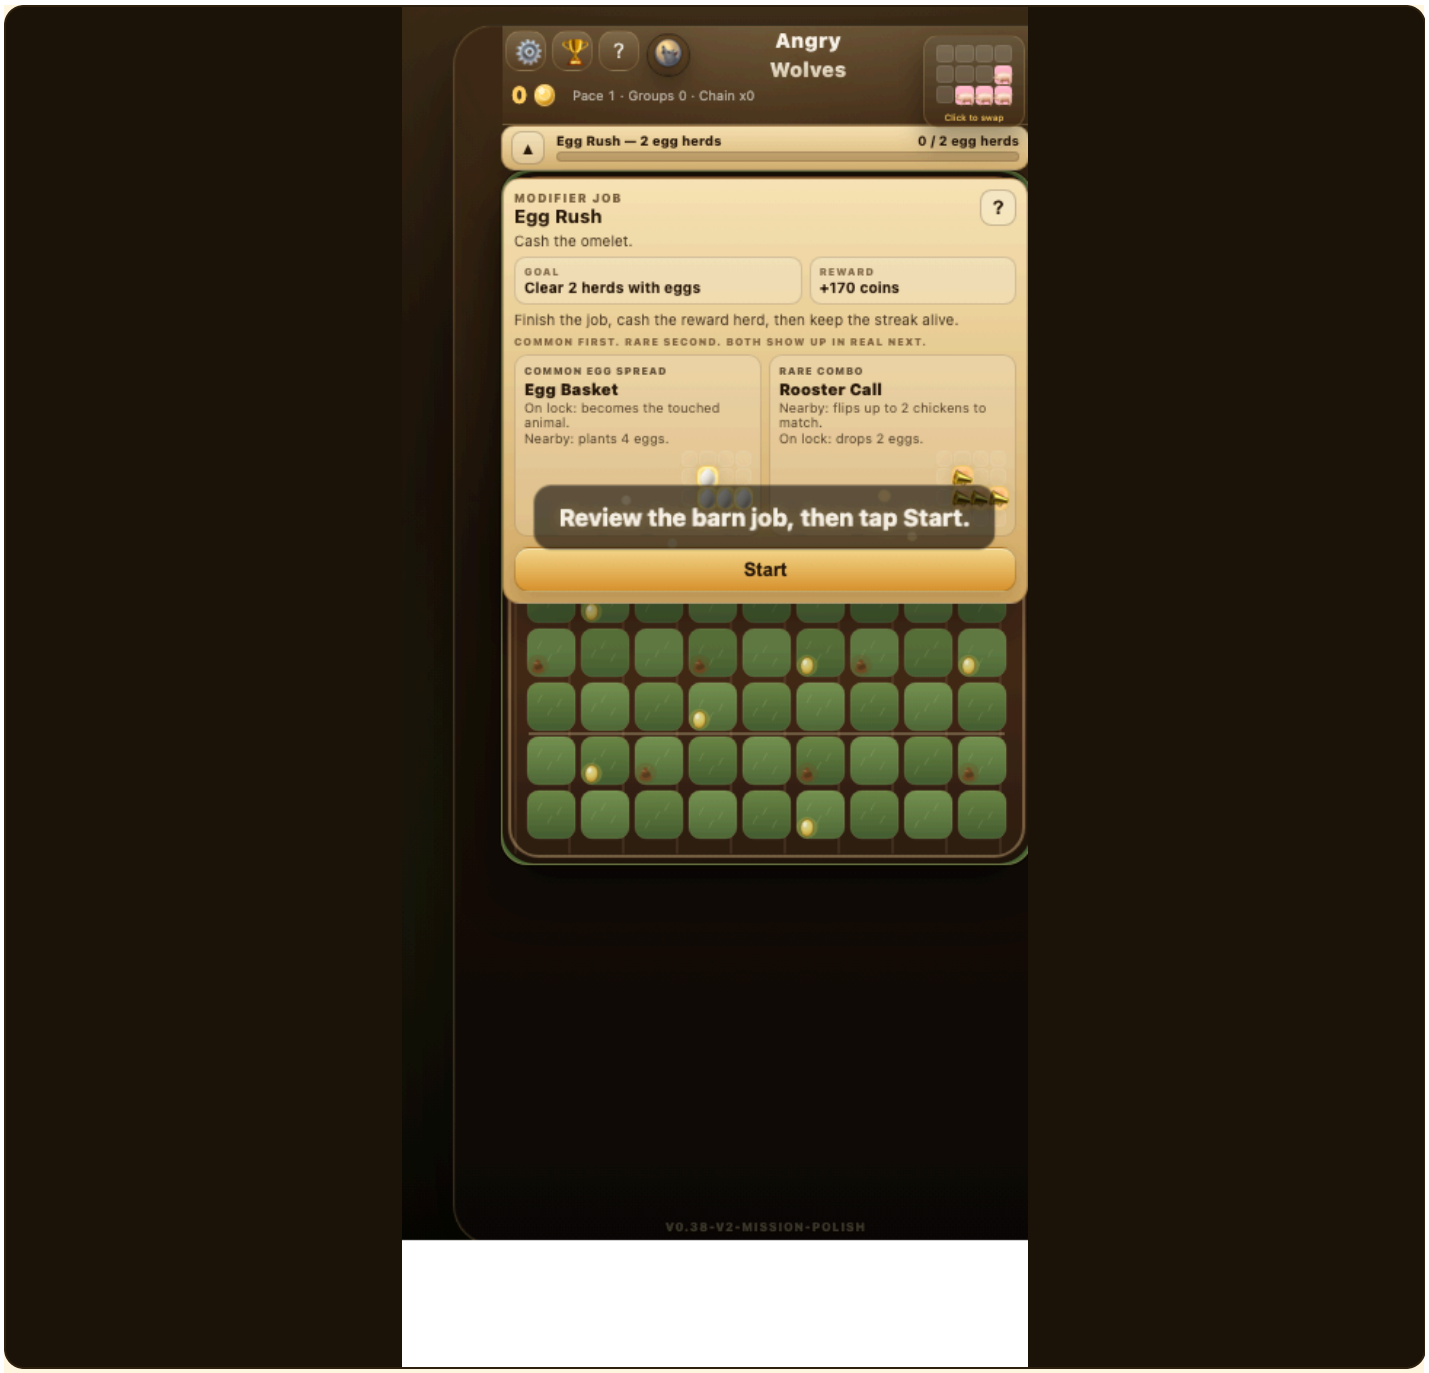
First Flock startup drawer.



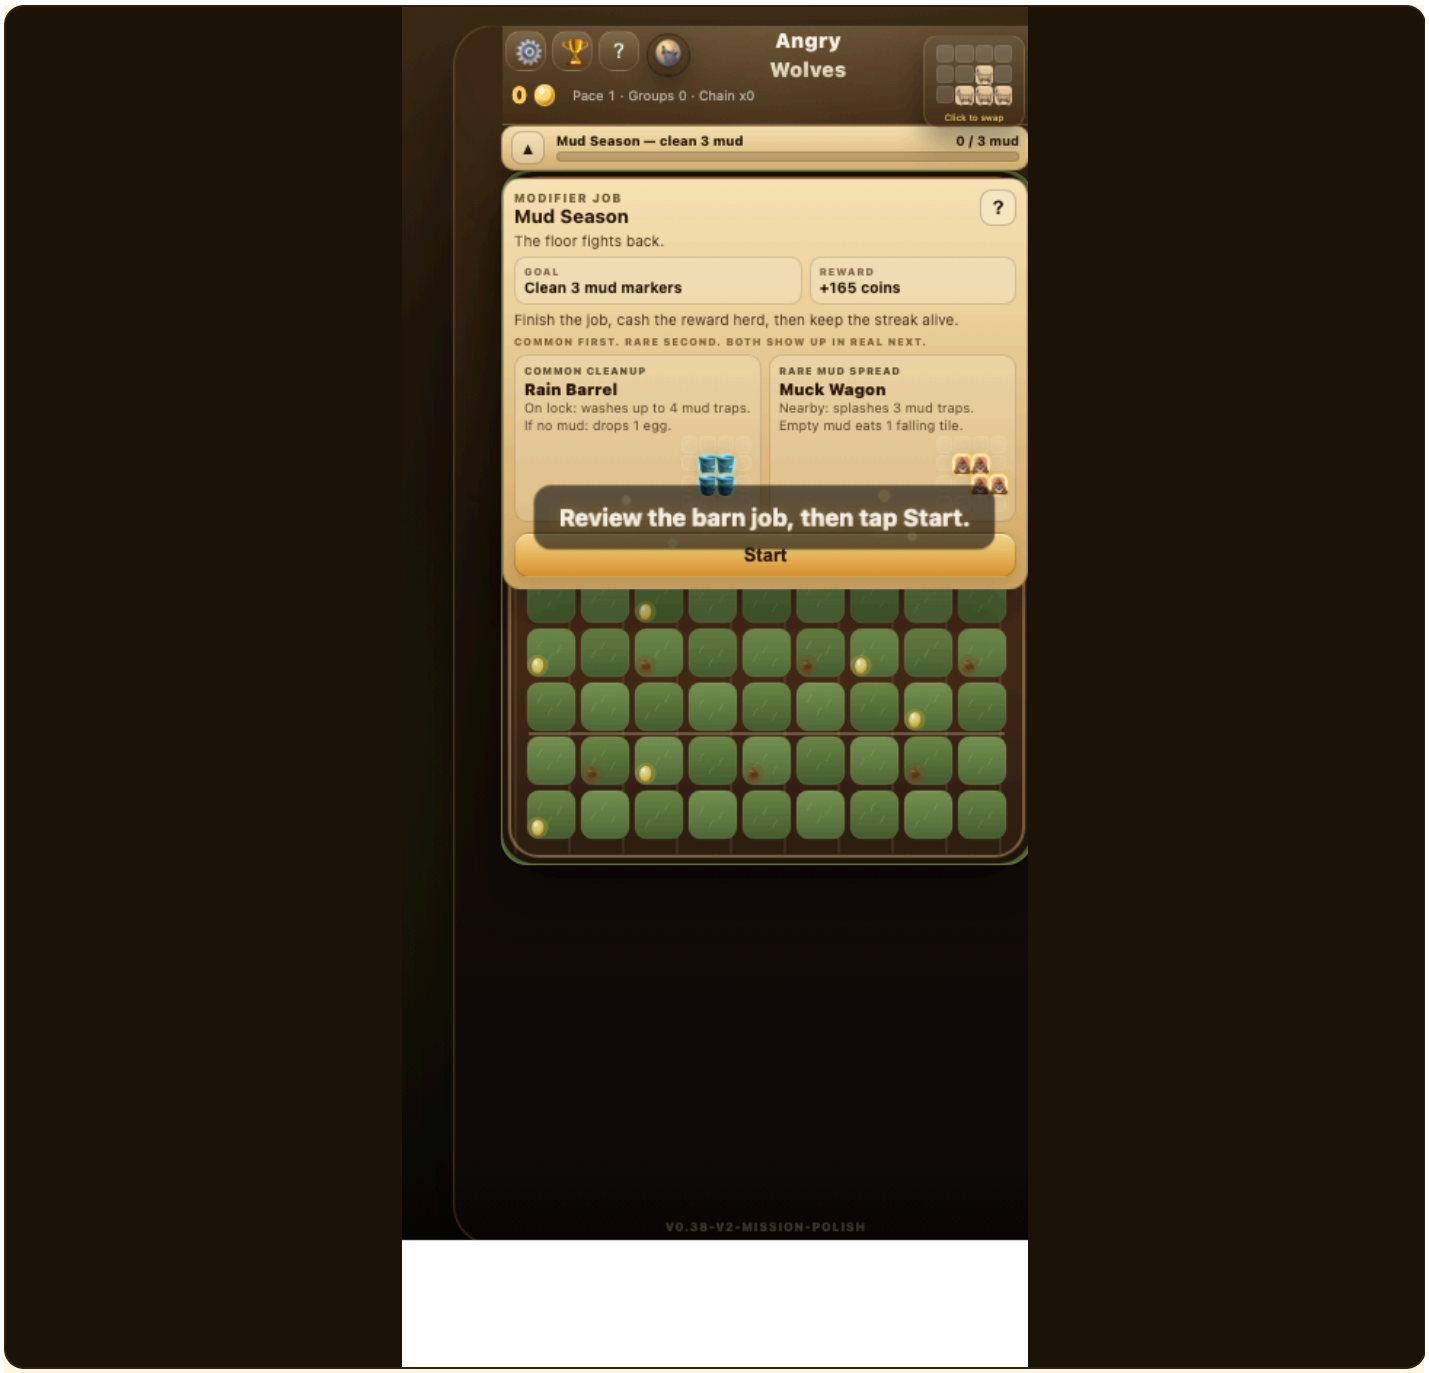
Early animal mission scaled to a one-herd target.



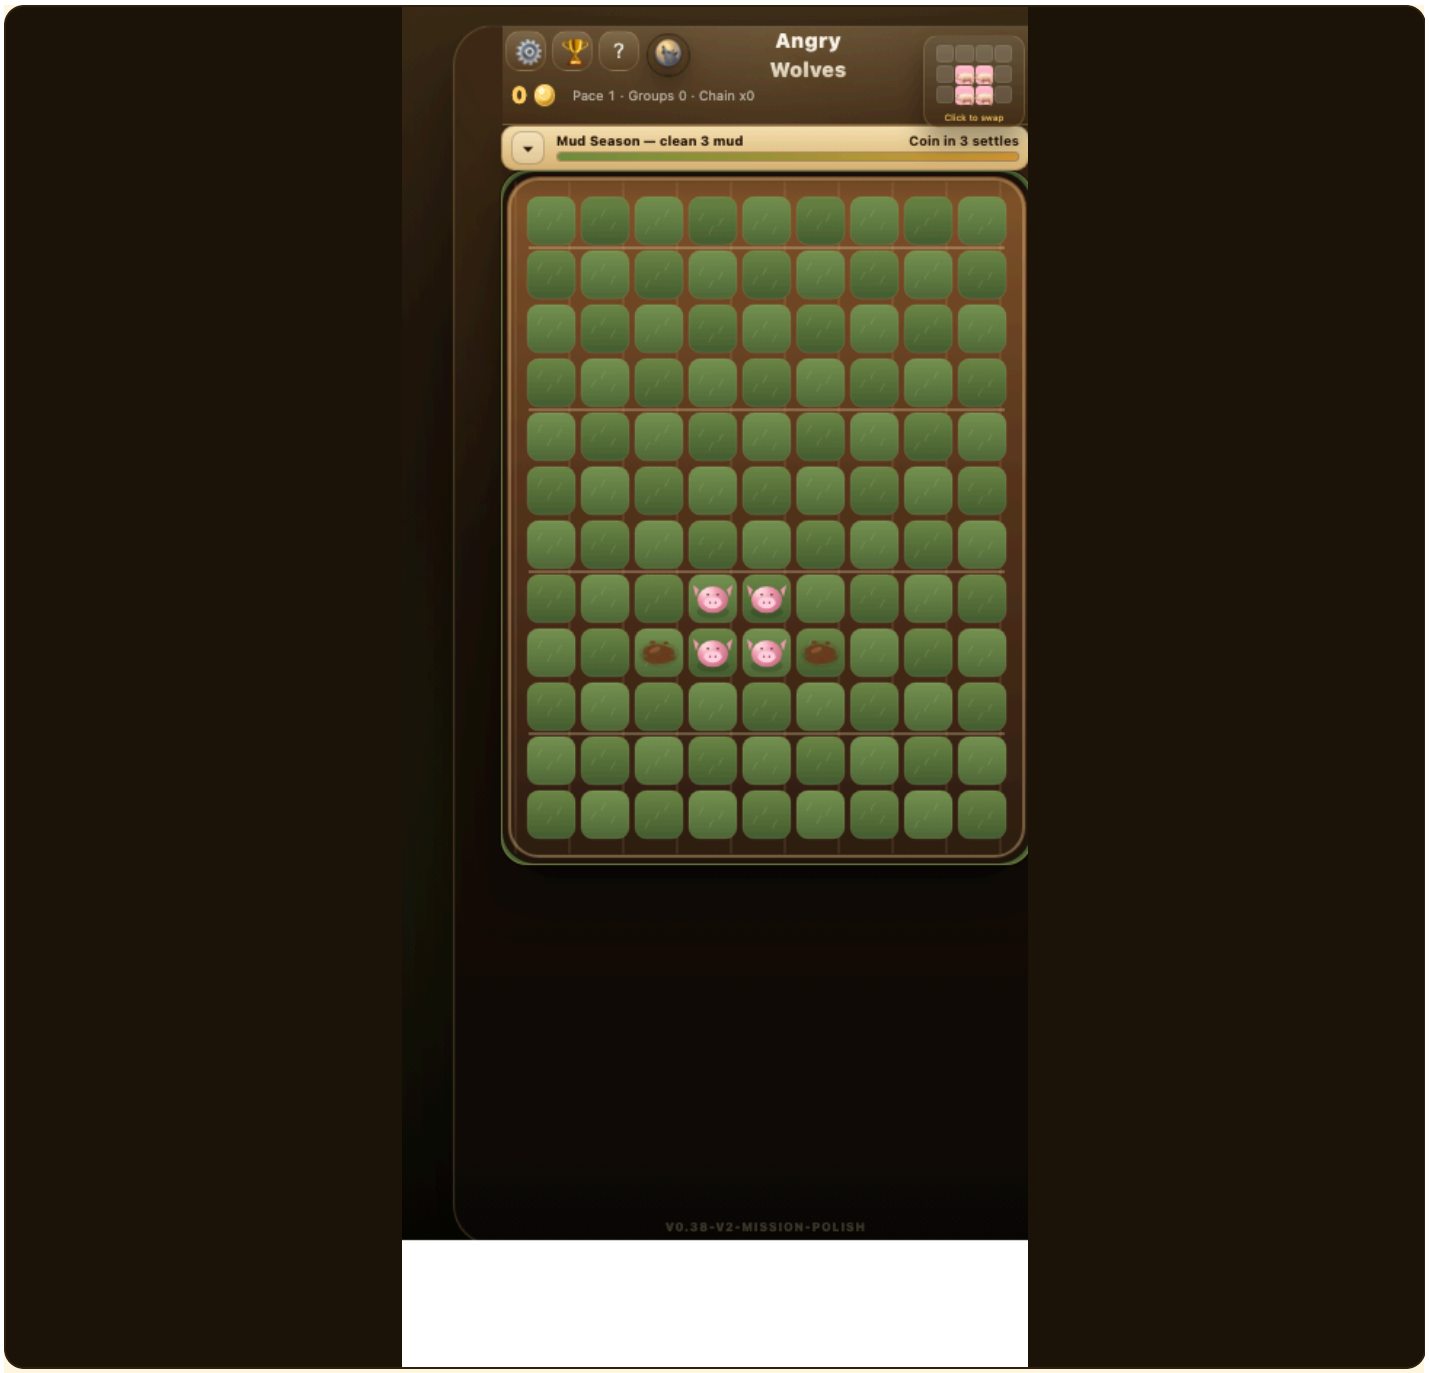
Later animal mission showing the two-herd target.



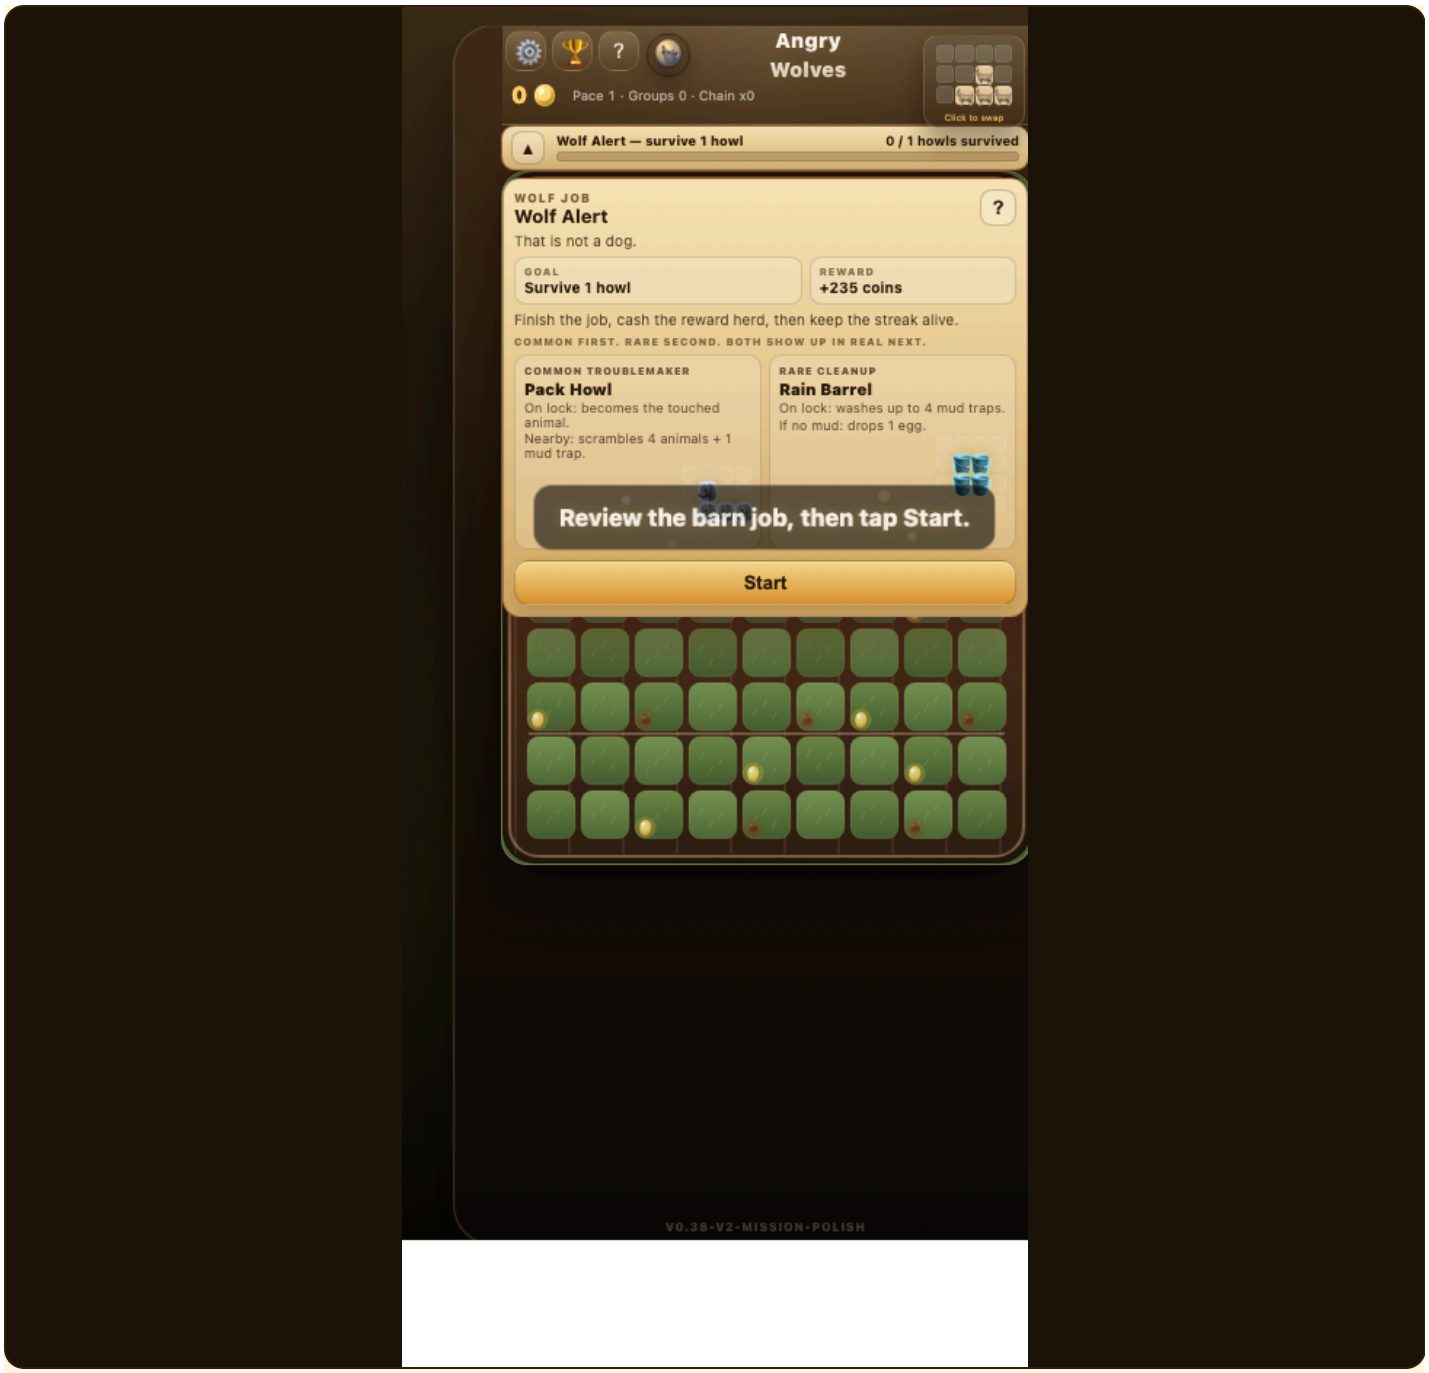
Egg Rush mission drawer.



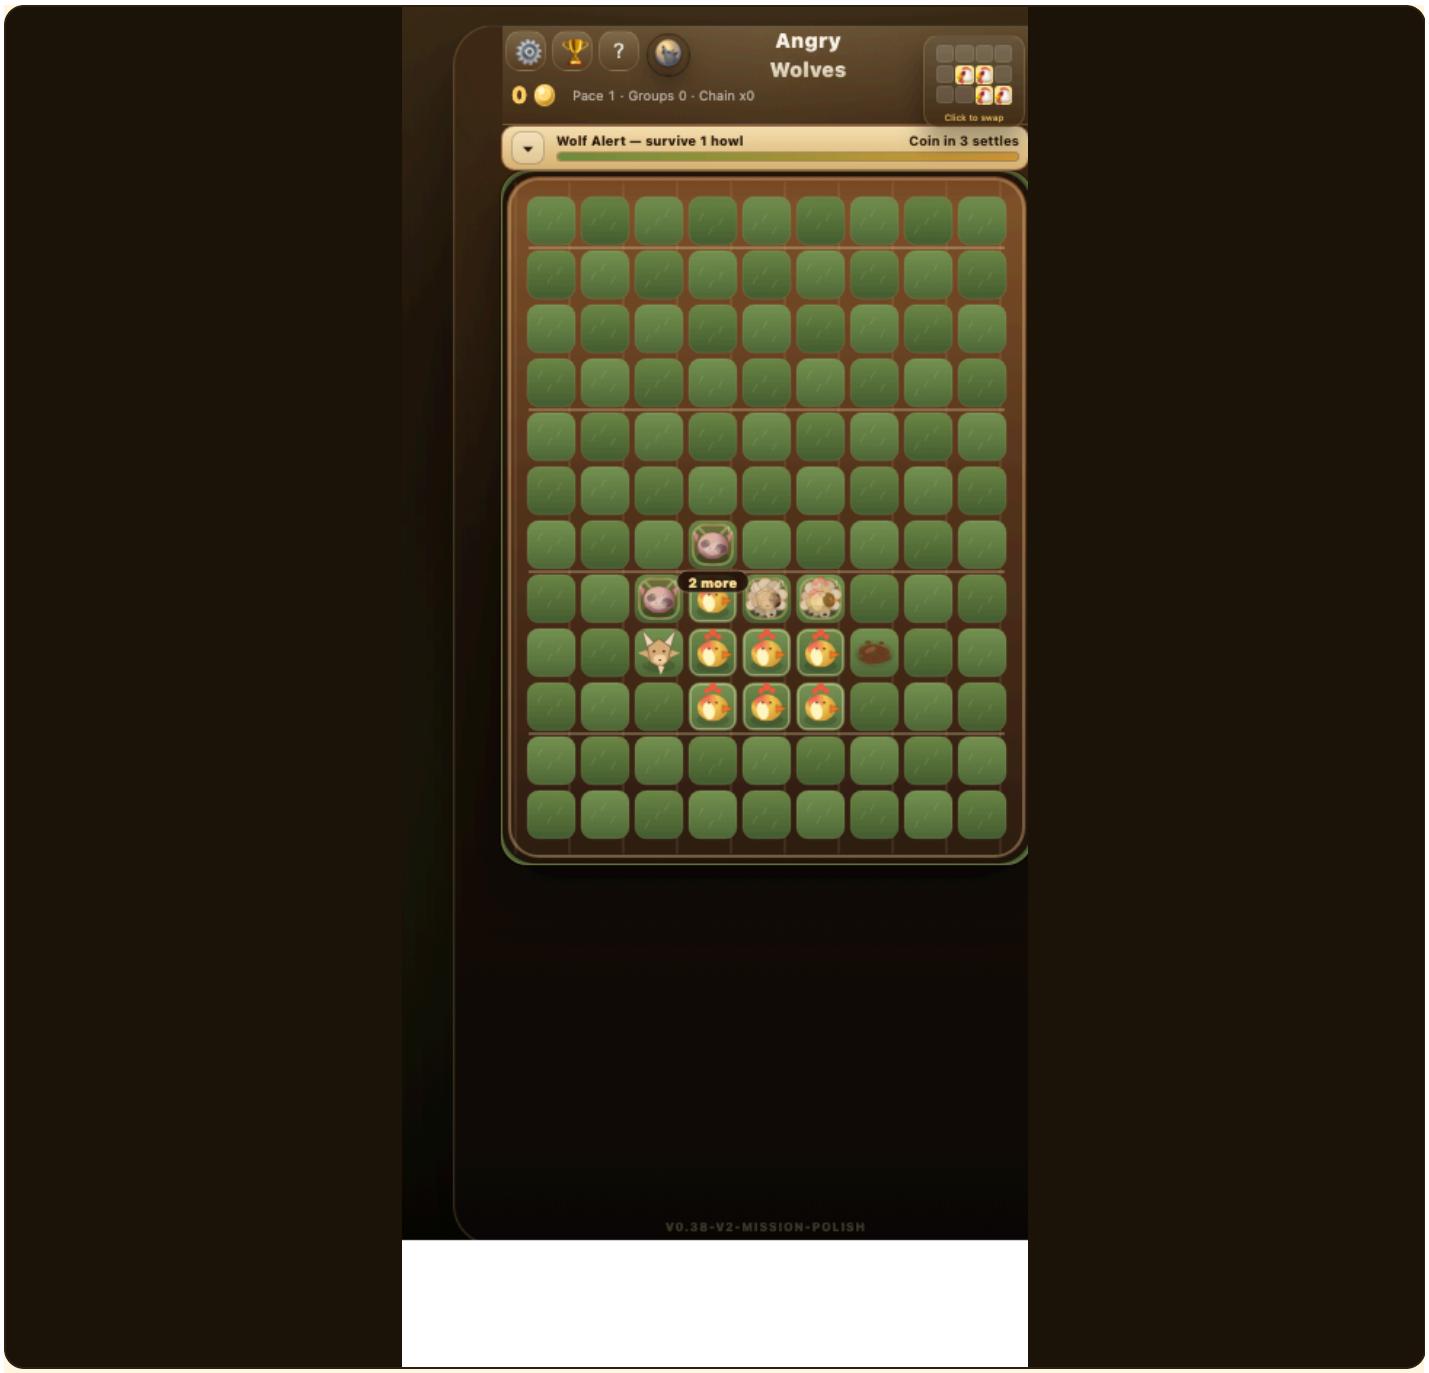
Mud Season drawer with Rain Barrel copy.



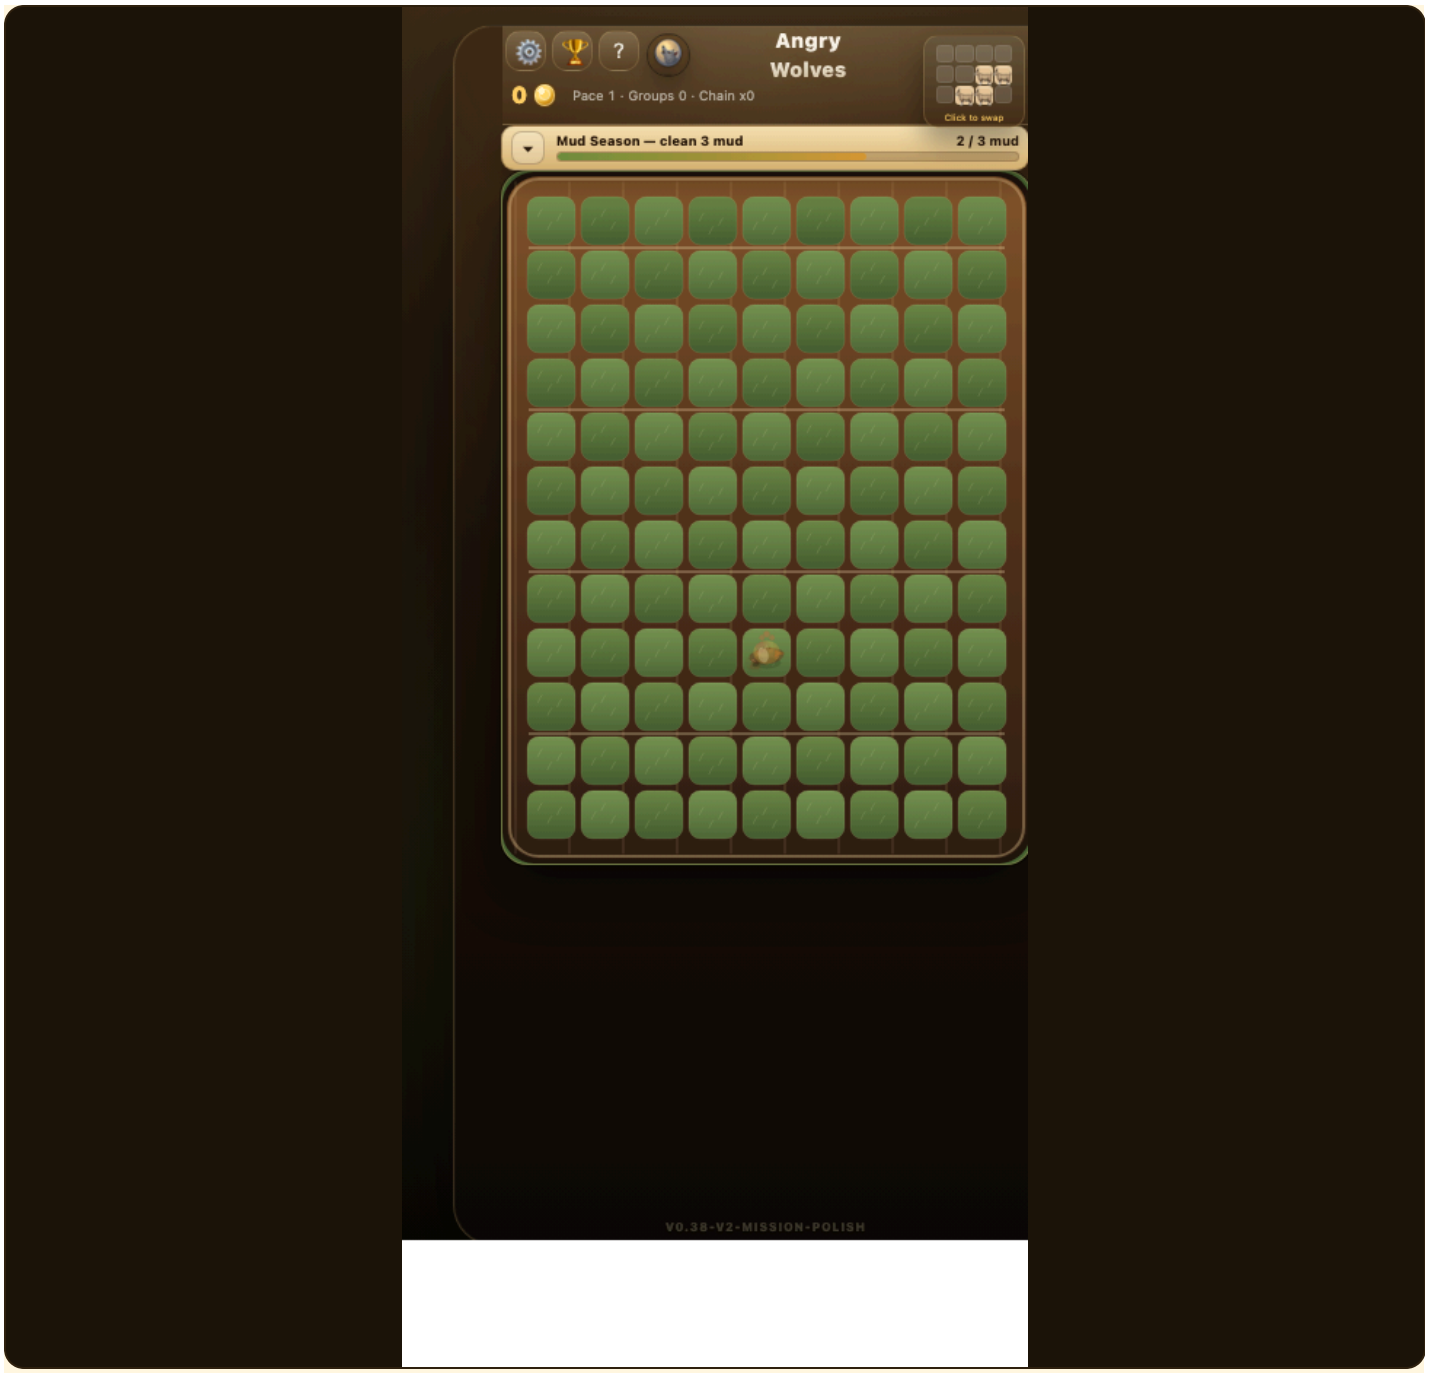
Debug capture for Rain Barrel cleaning mud.



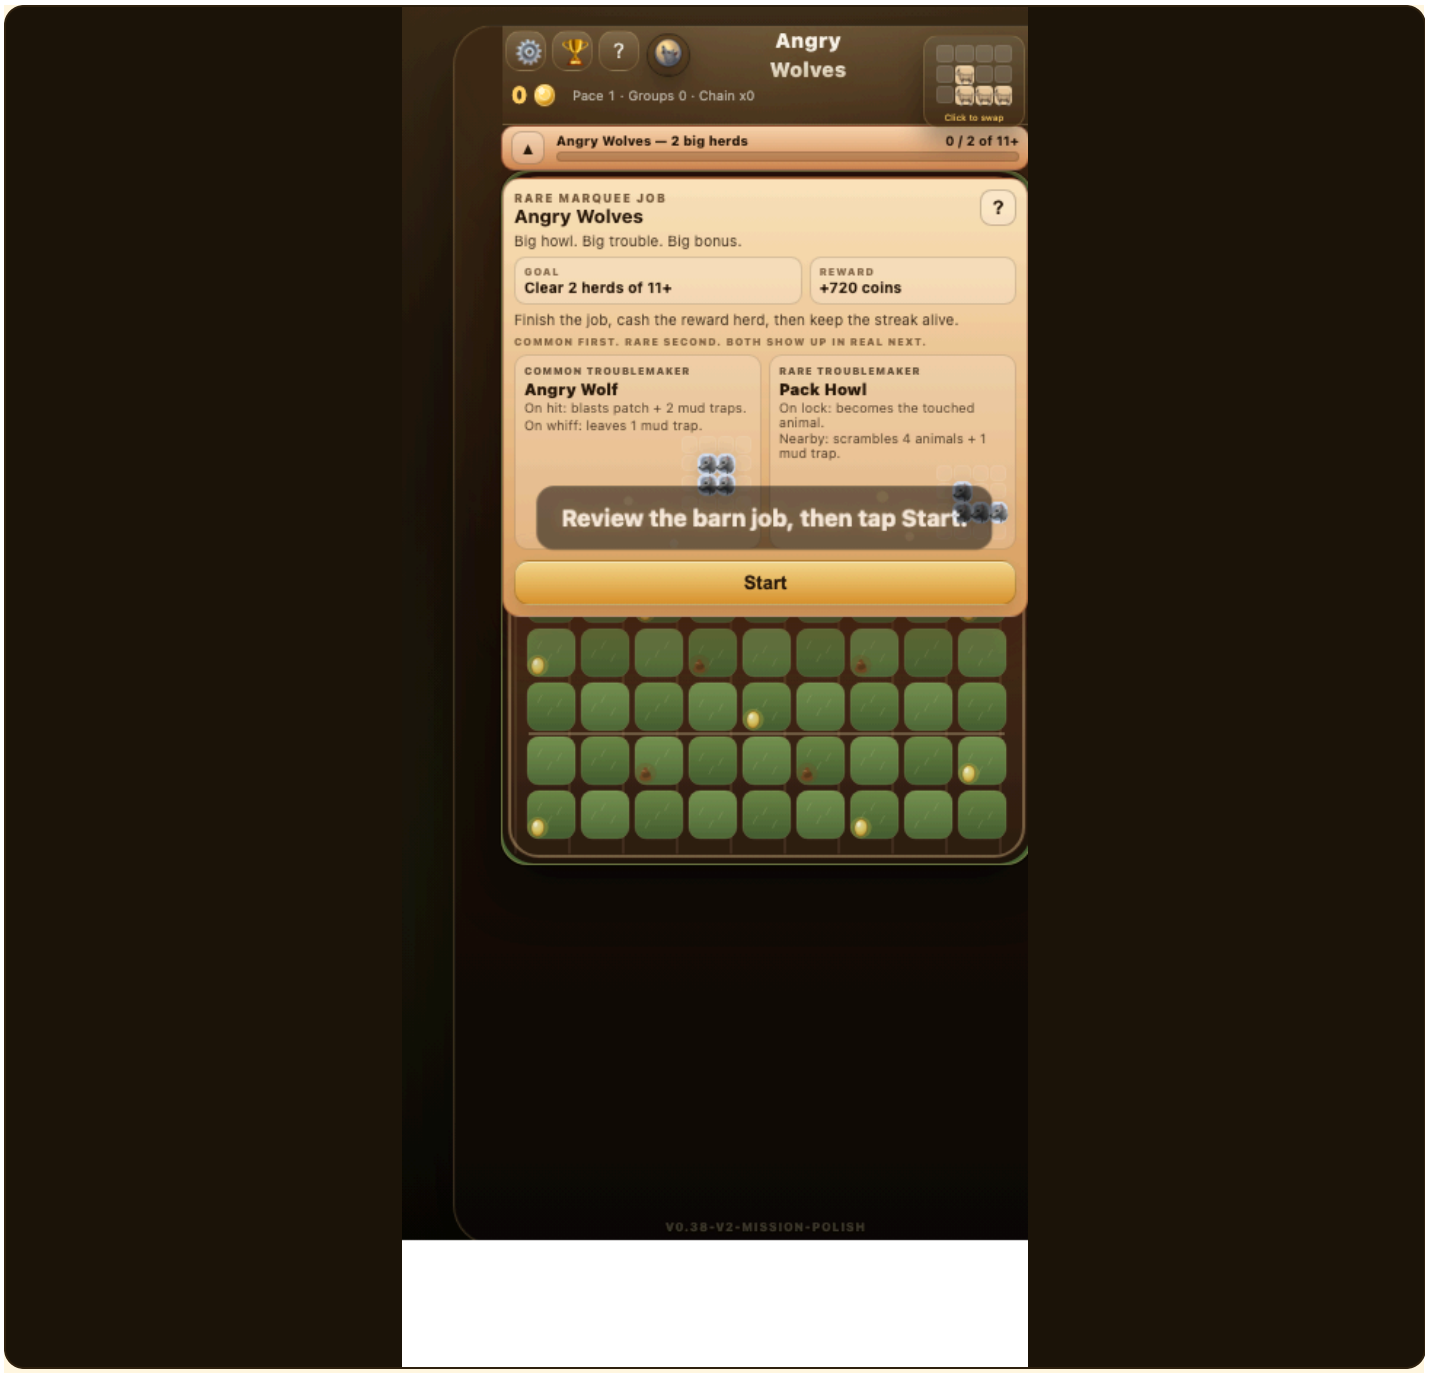
Wolf Alert with “survive 1 howl” wording.



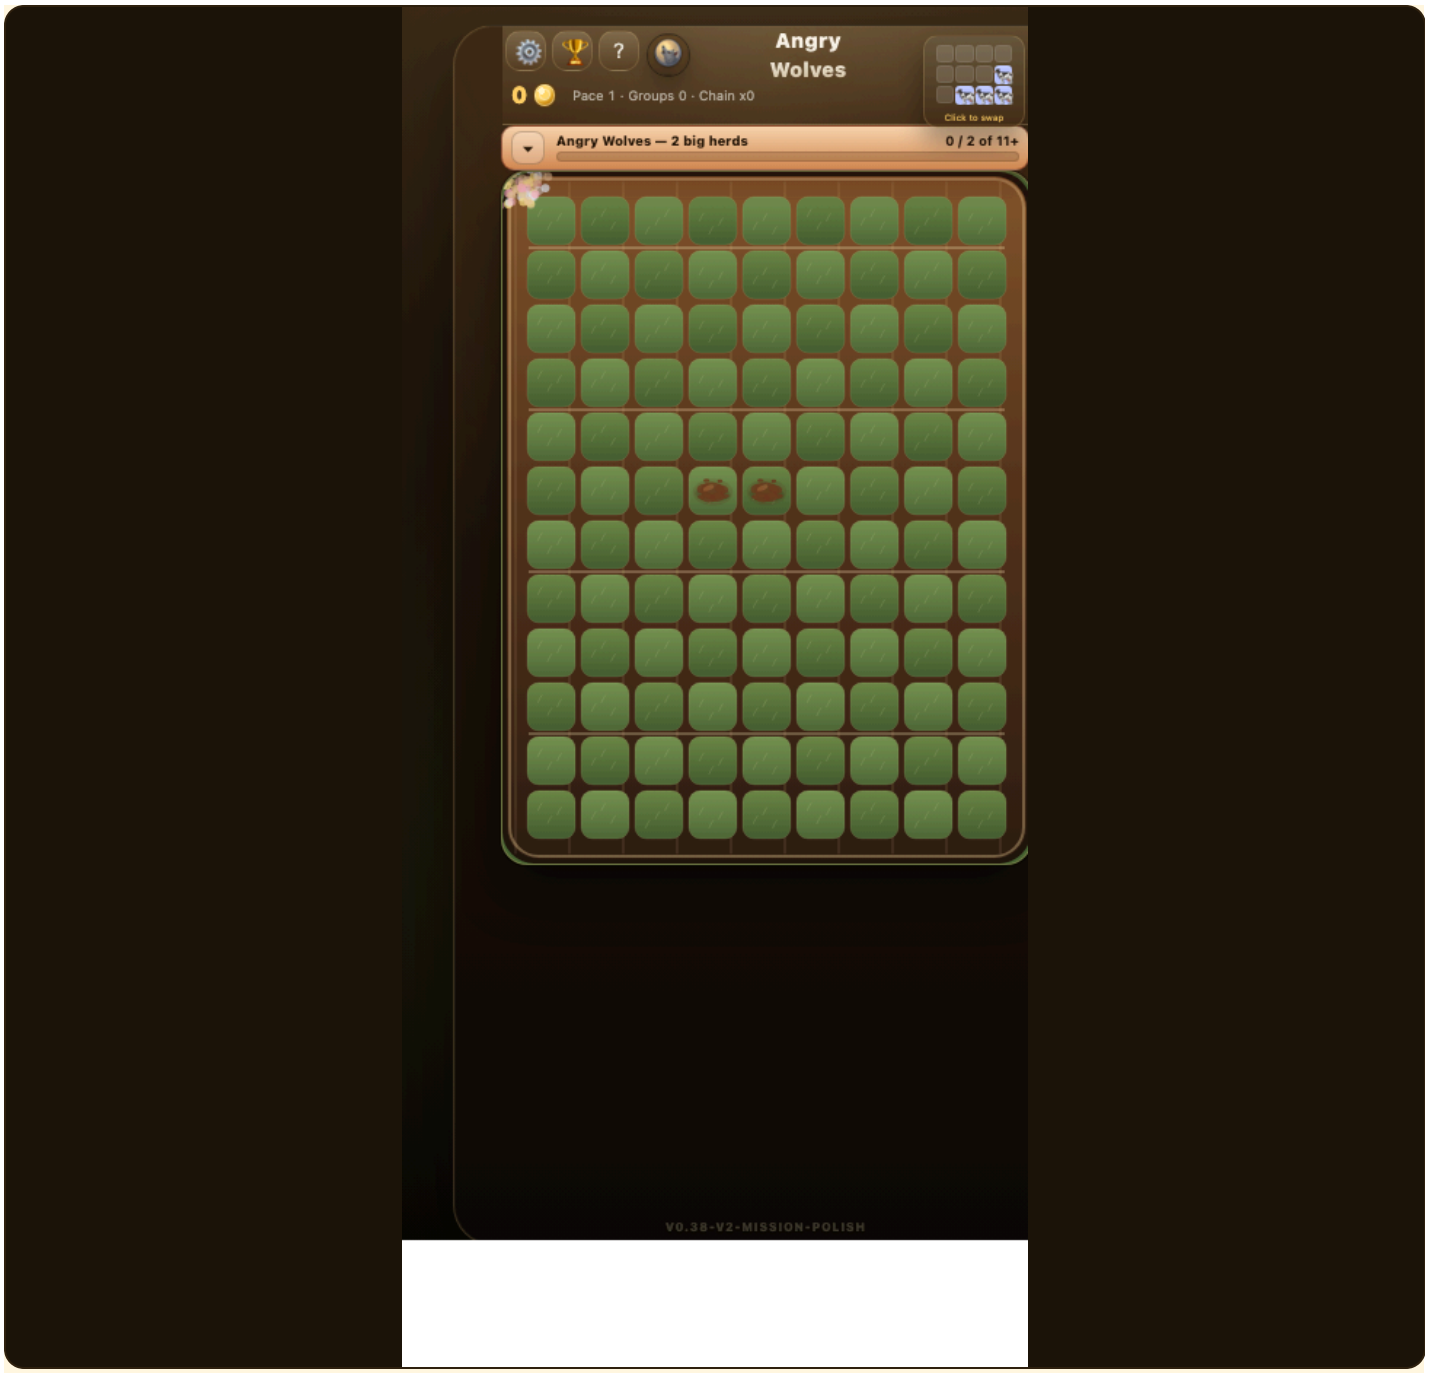
Debug capture for Pack Howl feedback.



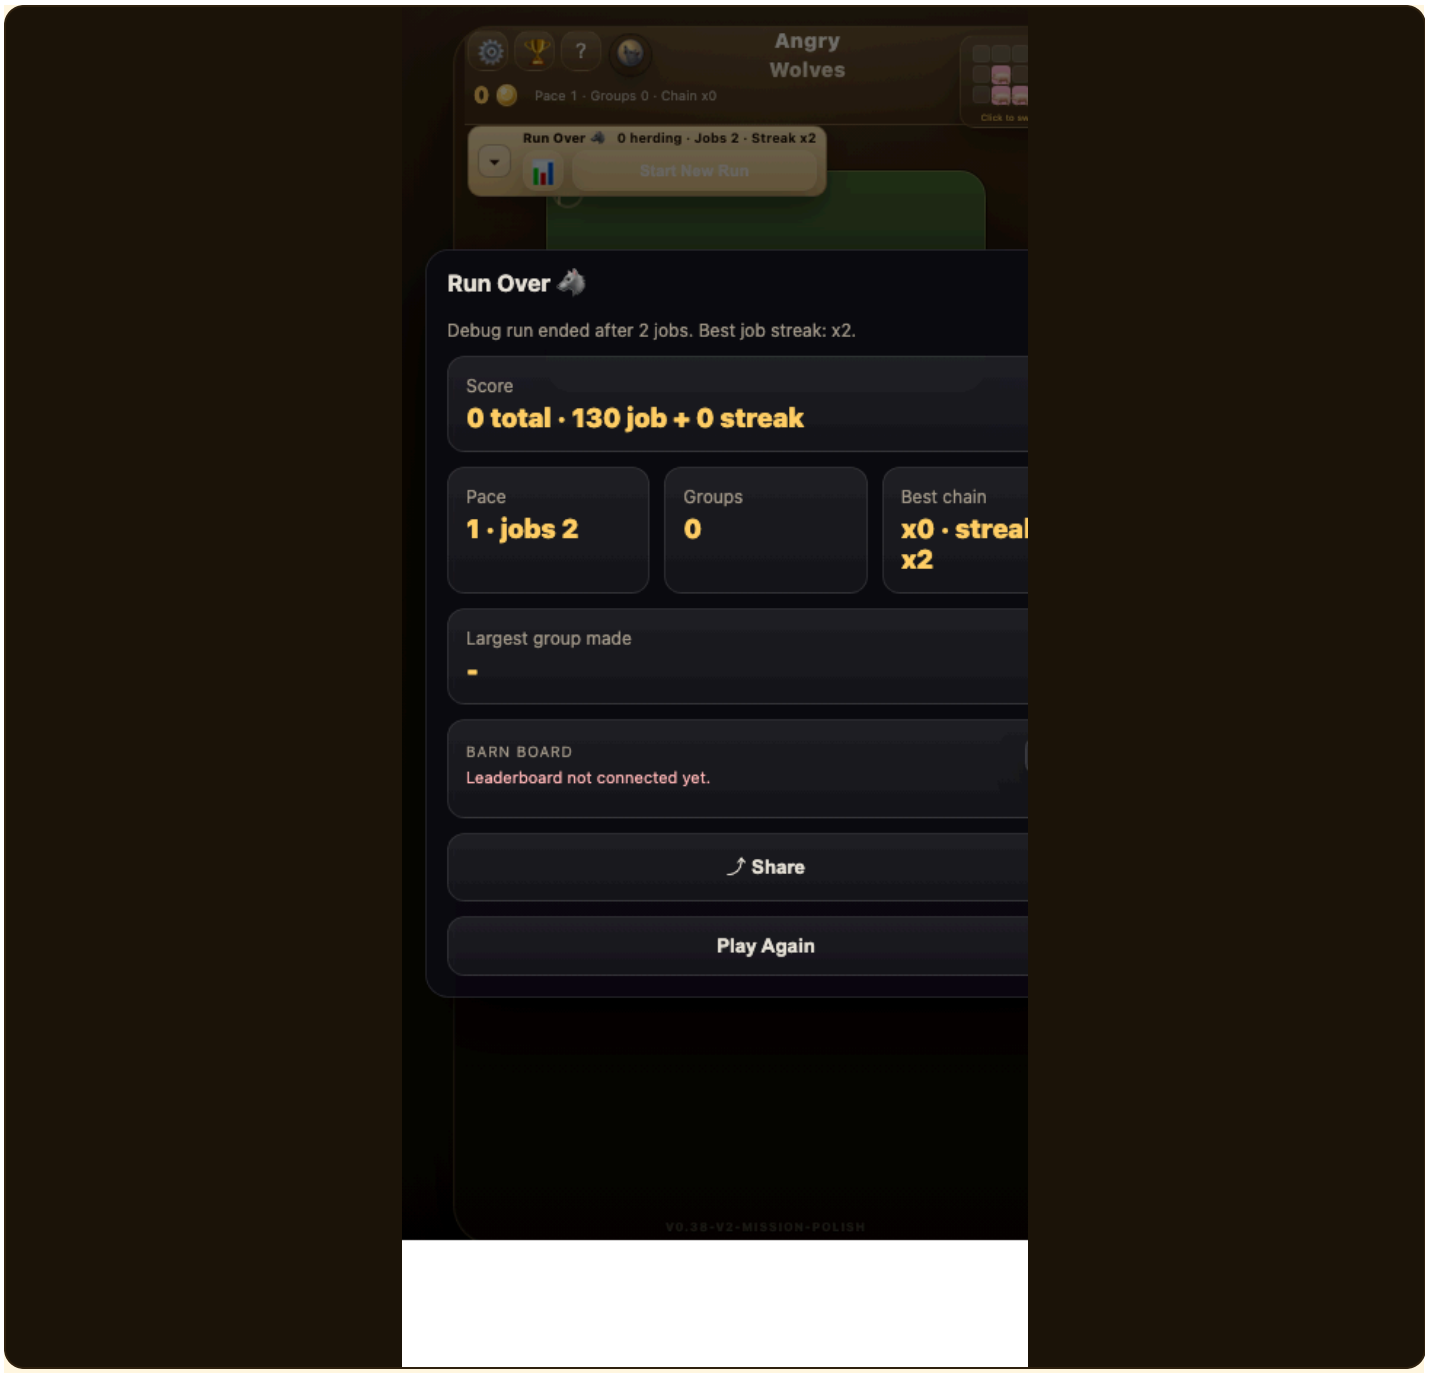
Debug capture for mud eating one falling tile.



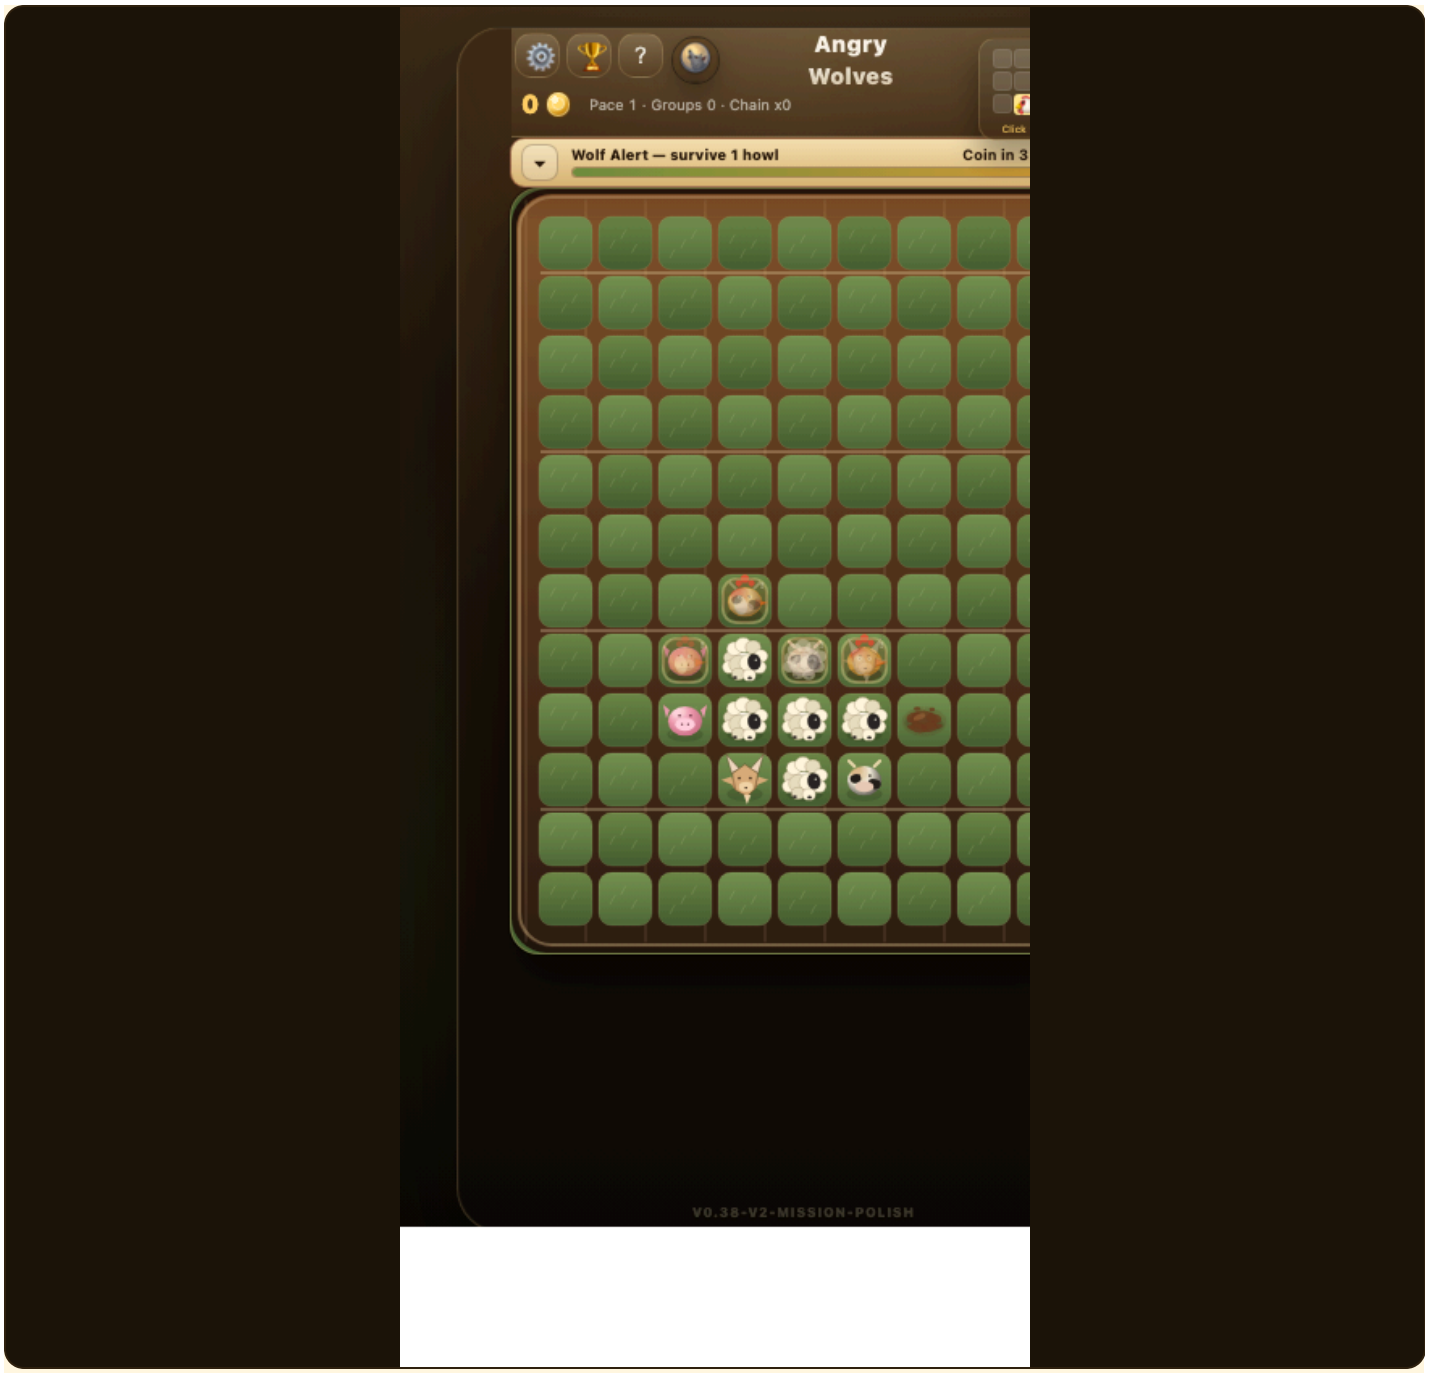
Angry Wolves warning drawer.



Debug capture for Angry Wolf leaving mud.



Run-over panel with jobs and streak stats.



iPhone-sized full layout check.
